🎓 EDUCATION

BSc Computer Sciences,
University of Lagos

11/2014 – 11/2019 | Lagos, Nigeria

🧠 SKILLS

- React.js/Next.js
- React Native
- Node.js/Express.js
- TypeScript
- Microservices Architecture
- AWS
- Kubernetes
- Cloud Infrastructure
- AI tooling

🌐 LANGUAGES

English

📄 SUMMARY

Versatile senior software engineer with a strong foundation in frontend technologies like Next.js, Vue.js, Angular.js, and Express.js, and cloud infrastructure management using AWS and Kubernetes. Strong team player, also experienced in leading teams through complex migrations and optimizing AI tools to enhance coding practices, demonstrating adaptability and a commitment to quality in fast-paced settings.

🏢 PROFESSIONAL EXPERIENCE

Senior Software Engineer, Bolt OÜ

11/2024 – Present | Tallinn, Estonia

- Maintained and developed Bolt's global website, managing page developments, content localization, and syncing to 20+ languages using a monorepo approach with multiple NextJS applications; executed infra updates and deployments utilizing AWS, Kubernetes, and Docker.
- Migrated codebase from Gatsby to NextJS while ensuring thorough documentation practices.
- Utilized AI tools for development, incorporating anthropic models in Cursor, creating reusable prompts for the team, and establishing AGENT.md 📄 files to guide AI agents on codebase conventions.

Senior Frontend Developer, Edurio ULTD

03/2024 – 10/2024 | Remote

- Developed and improved web applications in Vue.js while serving as a senior developer.
- Developed frontend library with Storybook and migrated codebase from legacy vue2 to vue3 for Edurio's survey-builder while working remotely.
- Developed responsive web applications using modern JavaScript frameworks.
- Collaborated with designers to implement user-friendly interfaces.
- Optimized website performance through code reviews and refactoring.

Software Trainer, Software Development Academy

02/2020 – 06/2024 | Remote

- Conducted training sessions at SDA, an online software training academy, focusing on JavaScript, HTML, CSS, and Java, along with core programming concepts, during workshops sponsored by companies like Accenture.

Senior Frontend Developer, Qminder

01/2021 – 11/2023 | Tallinn, Estonia

- Developed and maintained UI components with Angular 16, ensuring adherence to established workflows for optimal performance.
- Designed and implemented drag-and-drop components in Vue for Qminder's virtual queue web app, enhancing user experience.
- Updated Qminder backend and website with feature improvements and UI migrations, contributing to a more seamless user interface.

Lead Frontend Engineer, Safaricom PLC

01/2018 – 12/2020 | Remote

- Led remote team of 9 frontend developers to build and deploy Safaricom's first self-service portal using Next JS, improving user access to services. Established CI/CD pipeline for 2 user-facing dashboards, enhancing deployment efficiency. Coordinated planning, task allocation, and reviews within frontend team, collaborating closely with project manager to align project goals.
- Designed solutions to enhance telecommunications infrastructure and improve service delivery.
- Collaborated with cross-functional teams to troubleshoot network issues and optimize performance.
- Conducted system testing to ensure compliance with safety and quality standards.

PROJECTS

Bolt, <https://bolt.eu/>

11/2024 – Present

Bolt website serves over 50+ countries, built with NextJS in a monrepo setup, and connected to a custom CMS to handle automatic content localization and syncing.

I work on the web team and handle page development and deployment, content syncing and updates, bug fixes, and infra updates across the Bolt website ecosystem.

Safaricom Business Hub, <https://www.business.safaricom.co.ke/>

01/2018 – 12/2020

Self-service portal built in NextJS for users to access Safaricom service offers and track orders for services.

Spearheaded the decision to use Typescript to enforce type safety based on the projected scale of the application.

App was developed and deployed within project parameters, and drastically reduced user support tickets from customers.
